Beat the heat! Escape the heat without breaking the bank or the planet.

◊ Turn up the thermostat before leaving your house
  Turn your AC up to 80 during the day to conserve energy during peak daytime usage

◊ Replace your air-conditioning filters once a month
  Dirty filters can block airflow and increase your energy costs

◊ Close your blinds to keep the sun out and your living and working spaces cool
  Radiant heat from sunlight can raise your indoor air temperature, causing you to crank up your AC

◊ Take a “staycation” by exploring Tallahassee’s local attractions

◊ Drink water out of your reusable bottle to stay hydrated
