Lights off.
Turning the lights off when leaving the room helps conserve energy and reduces your environmental impact.

Conserve.
Water is a precious natural resource. Less than 1% of the world's water is fresh, accessible, drinking water. Turn off the tap when you can and report any leaks.

Reuse.
Reusing paper, envelopes, and boxes will help reduce waste and clutter. Don't forget to print double sided when you can.

Prepare.
Be ahead of the game. Using a reusable coffee mug reduces waste and keeps you ready for the day, in the office and on the go.
Power down.

Give your computer a well deserved rest so it can perform well. Shut down your screen, speakers, and tower for the evening.

Out of juice?

Don’t play with duds. Take dead batteries, ink cartridges, and electronics to the bin outside the FSU Bookstore, inquire in your office about collections, or call Solid Waste & Recycling at 644-6919.

Remember.

These come from trees. Please conserve natural resources and take only what you really need.

Print responsibly.

Please print double-sided whenever possible. Consider whether a document can be printed in grayscale versus color. Consider if certain documents need to be printed at all.
